SUMMARY

SDET with ~4 years of experience designing and maintaining automated QA frameworks and integrating security testing into CI/CD pipelines. Proficient in TypeScript/JavaScript with Playwright, Cypress, and Selenium; experienced in API testing (Postman, GraphQL) and hands-on security validation using Burp Suite. Strong Linux and DevOps background with Azure DevOps and GitLab; currently pursuing PJPT to strengthen DevSecOps and offensive security skills.

SKILLS

TypeScript, JavaScript, Automation Testing, Manual Testing, API Testing, Security Testing, Burp Suite, Linux, C#, Playwright, Cypress, Selenium, GraphQL, MongoDB, Postman, NUnit, Azure DevOps, GitLab, QASE, Jira, Confluence, BrowserStack, Dev Tools

EXPERIENCE

QA & Test Engineer

Feb 2026 – Present

Amihan Solutions Inc.

- Executed comprehensive manual and automated test plans for Oracle APEX applications, ensuring high software quality.
- Developed and updated test cases and scripts using Playwright for robust UI/API automation and regression testing.
- Maintained test environments and integrated SQL data with CI/CD pipelines to streamline testing processes.
- Reviewed peer pull requests to uphold code quality standards and ensure maintainable, production-ready changes.
- Diagnosed and optimized the test/code path to eliminate flaky behavior and improve overall test reliability.

Junior Software Development Engineer In Test

Jun 2025 – Dec 2026

Theoria Medical

- Integrated security-focused test cases into regression suites, identifying potential vulnerabilities early in theSDLC
- Maintained and debugged automated test scripts in CI/CD pipelines, reducing flaky tests by 20%
- Conducted root cause analysis on production incidents, distinguishing between code defects andenvironment misconfigurations

- Collaborated with senior QA and SDET to enhance and maintain 10+ E2E and API automation scripts using Playwright, improving testing efficiency by 30%.

Quality Assurance Engineer

Jun 2023 – Jun 2025

Theoria Medical

- Designed robust Cypress automation frameworks that accelerated regression testing cycles by 40%
- Validated application behavior across tablet form factors and major browsers, documenting issues and supporting timely fixes.
- Managed end-to-end test planning for multiple zero-critical-bug releases
- Built CI/CD pipelines to automate smoke testing on pull requests, improving deployment confidence

Lead Quality Assurance Engineer

Feb 2023 – Jun 2023

Innovuze Solutions Inc.

- Directed QA strategy for enterprise projects, enforcing strict code quality and security standards
- Mentored junior testers in Cypress/Javascript automation and security awareness, reducing defect escape rate
- Developed and implemented a new automation workflow, transitioning from C# Selenium to Cypress/JavaScript, enhancing CI/CD integration with Azure DevOps.

Software Quality Assurance Engineer

Aug 2022 – Feb 2023

Innovuze Solutions Inc.

- Create detailed, comprehensive and well-structured test plans and test cases
- Estimate, prioritize, plan and coordinate testing activities
- Design, develop and execute automation scripts using C# and Selenium
- Perform thorough regression testing when bugs are resolved
- Create and maintain CI/CD (Build and Release) Pipeline for tests
- Conduct other various testing for each project which may include but not limited to: API testing, Regression Testing, Performance Testing, Penetration Testing

EDUCATION

University of Science and Technology of Southern Philippines

Bachelor's in Information Technology

CERTIFICATIONS

CyberOps Associate (Course Completion)

Cisco Networking Academy

Practical Web Application Security and Testing (ongoing)

TCM Security
